**Subject:** RE: Elwha Water Treatment Plant (WA0026662) administrative extension and contact info

As soon as the application dates have a more current date, ICIS will automatically change the status to Administratively continued. Since the application dates are before the current issue date of the permit – the status will remain expired.

Application Received Dates	
Application/NOI:	04/11/2007 
Complete Application/NOI:	04/11/2007

**Importance:** High

Cathy,

Hi! Is it that simple to “turn on” a permit to make it “administratively continued” as it was mistakenly coded as “expired.” The application for renewal was received on 2/3/2014.

Any tips would be appreciated so I can respond to the permit writer’s request.

Thank you!

Sharon 206-553-0705

NPDES ID: WA0026662 Issue Date: 04/11/2007

Sharon:

See the forwarded message. I had tried to communicate to Diane (I believe shortly before she left) that, for the Elwha Water Treatment Plant NPDES permit (WA0026662):

- The cognizant official had changed, and
- The permit is, in fact, administratively continued (as stated in the attached letter), whereas ICIS shows that it is expired.

Could you please make the necessary changes in ICIS?

Thanks,

Brian Nickel, E.I.T.

Diane:

I looked up the subject permit in ICIS today, and it states that the permit is expired (not administratively continued) and that the date for receipt of a complete application was 4/11/2007. This is not correct. As shown in the attachment, we received a new application on February 3, 2014, and determined that it was timely and complete, thus, we told the operator of the facility that the permit is administratively continued.

Also, I received a phone call from Mr. Mike Green with Veolia Water (the facility's contract operator) stating that Mr. Tom Hubbard is no longer the cognizant official. The new cognizant official is Mike Green, and his phone number is 503-807-5241

Thanks,

Brian Nickel, E.I.T.
